

IBRAHIM GUNAWAN

FRONT END ENGINEER

Jakarta, Indonesia | (+62) 85174361878 | baimgunawan1@gmail.com | github.com/ibra132 | linkedin.com/in/ibrahim-gunawan | ibradev.vercel.app

A **Frontend Engineer** with a strong focus on building **scalable, user-centric, and visually engaging web applications**. Skilled in leveraging modern technologies such as **Vue, React, Next.js, and TypeScript** to deliver **robust frontend architectures**. Experienced in crafting **intuitive interfaces, responsive designs, and optimized performance** using tools like **Tailwind CSS, SCSS, and Cypress** for testing. Adept at collaborating in **agile, cross-functional teams**, integrating with microservices, and maintaining **clean, maintainable codebases**. Passionate about turning complex problems into **elegant digital solutions** that enhance user experiences and business value.

PROFESSIONAL EXPERIENCE

Front End Developer Intern

August 2025 - Now

PT WIR Asia

- Developed a marketplace web application called Ti Oan, distributed in Timor-Leste, similar to Shopee/Tokopedia for local products.

Front End Developer Intern

January 2025 - July 2025

PT Qtera Mandiri

- Developed and maintained web applications for Fixed Asset Management (tracking, depreciation, and auditing of long-term assets) and Supply Asset Management (real-time monitoring and forecasting of consumables), improving efficiency, data accuracy, and cost control.
- Collaborated in a Micro Frontend architecture and integrated frontend modules with backend microservices using TypeScript DTOs for type-safe, reliable API communication.
- Ensured code quality through Cypress E2E and unit testing, and managed source code with Git/Gitea for effective collaboration.

Web Developer Intern

January 2023 - February 2023

PT Adici Jaya Bersama

- Developed a web-based e-learning application called "SIPS" to support the educational needs of schools, providing an accessible and interactive learning platform for students and teachers.
- Designed wireframes and website layouts based on client requirements, ensuring the creation of visually appealing, user-friendly, and responsive web interfaces that align with modern design principles.
- Explored and applied React Native to develop basic mobile applications, broadening knowledge of cross-platform mobile development and understanding of mobile-specific design and performance considerations.

EDUCATION

Esa Unggul University

2024 - Now

Computer Science (Employee Class)

SMKN 56 Jakarta (Multimedia)

2021 - 2024
